DATE DISTR. 13 MAY 1949

NO. OF PAGES 2

NO. OF ENCLS.
(LISTED BELOW)SUPPLEMENT TO
REPORT NO.

representative of the SMA, and representatives of the Deutsche Handelsgesellschafts sections for electrical equipment and machine construction also attended. The conference had been called to discuss problems connected with a contemplated expansion of production. The work day in all firms is to be increased to 16 hours. The new production estimates are to be submitted by 20 April 1949 as they must be in Moscow by 1 May 1949.

2. The Oberspreewerk is to produce the following:

Radio receiving tubes: 6 AC 6, 6 Q 7, 6 E 5, 6 L 6, 5 Z 4,
6 J 6, 6 H 6, 5 D 21, 6 V 6.

Medical tubes: Ts 41

Transmitter tubes: Details not available

Special tubes: Impulse lamps
Special lamps 500 watt
Discharge lamps
Stabilizers, types 150/40z
280/80.
70/6
180/4
Rectifier lamps 110 and 190 watts
Hot cathode rectifiers
80-230 KV, 500-1,000 mA
X-ray tubes 200 KV, 6-30 mA
Mercury high-pressure lamps
200-5,000 watt
Amplifying tubesLayer resistors - 250,000 of 2,7,16 and 35 Kilo-Ohm for
0.25 to 2 watt loads

Tungsten and Molybdenum wire - increase from 1,200,000 m.

3. The representatives at the conference were assured that all of the various production bottle-necks would be eliminated. The DWK was to supply the combine with sheet-metal in all grades, and sheet copper for high frequency equipment and barium acid for the stabilizers. Czechoslovakia, Poland, and Yugoslavia would probably deliver coal and other raw materials. The hope was also expressed that the recent SMA personnel changes would be a factor in easing blockade restrictions.
4. The representatives were told that it was hoped to build the SAG Izolyator up into a large combine like those in Russia, embracing all of the various production phases, including tool shops, glass factories, etc. It was emphasized that the SAGs are considered Russian property, and hence not affected by the four-power prohibitions against German combines, and certain restricted industries. There is no chance of any intention of turning the SAG Izolyator back to German ownership.

25X1A6a

The 5D 21 tube was previously identified as a pulse modulator tube for radars.

~~CONFIDENTIAL~~

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1977, from the Director of Central Intelligence to the Archivist of the United States.

Document No. 013
